

SELECT BROILER FINISHER

Registration No: V 10761 Act 36 of 1947

Class: Broiler Finisher Feed

Form: Pellets

Description

The Select Broiler range has been specially designed for farmers who produce broilers to slaughter at 5 weeks of age. The rations in this range, except the post-finisher, include a coccidiostat and a growth enhancer.

Benefits

The Select programme was formulated to optimise performance for medium- to large-scale enterprises, considering environmental conditions and increased stocking density.

Feeding Recommendations

The finisher ration should be fed to broilers from 29–32 days of age. The approximate feed consumption should be 850 g per bird. If birds are marketed at an older age (beyond 35 days), the amount of finisher fed should be adjusted to allow for a 5-day withdrawal feed to be used, such as a post-finisher.

Expected Intakes

The approximate feed consumption should be 850 g per bird.

Composition

Nutrient	Quantity	Unit	Min/Max
Protein	160	g/kg	Min
Fat	25	g/kg	Min
Fibre	50	g/kg	Max
Moisture	120	g/kg	Max
Calcium	6	g/kg	Min
Calcium	12	g/kg	Max
Phosphorus	5	g/kg	Min
Total lysine	9	g/kg	Min
